

# Reordering Supplies for *Your Indoor Tower Garden*

*This sheet contains expected ongoing costs for one indoor Tower.*

Please use the Tower Garden School Order Form when reordering materials on the top half of this page.\*

## Recurring annual purchases (shipping included):

- Rockwool cubes for planting (98 for \$21.00)
- Adjusters for pH (\$31.00)
- If you primarily use only one of the pH adjusters, request on the order form to only purchase the adjuster you need (instead of purchasing both adjusters).
- Nutrient Solution Mineral Blends (A and B) — one gallon of each (\$65.00)
- Net pots (30 for \$19.00)

## Other materials that may need to be replaced every 3-5 years:

- Submersible pump (\$36.00)
- Tower Garden digital timer (\$32.00)

If issues arise with the LED Indoor Grow Lights, email [schools@towergarden.com](mailto:schools@towergarden.com) for details on prices for replacement parts.

\*New prices effective March 1, 2022.

---

The materials on the bottom half of this page may be purchased from the vendor of your choice.

## Recurring purchases:

- **Seeds** (any seeds you prefer)
  - Local hardware/farm stores have great seed options if it's not during the winter months when many seeds are unavailable.
  - You may also purchase seeds online, year-round, from the vendor of your choice.
- **Cleaning Supplies**
  - Vinegar — 4-6 gallons of vinegar each year for cleaning the Tower after complete disassembly. (Distilled vinegar from the baking aisle of the grocery store works well.)
  - Citric Acid — 100% Pure Food Grade (1 cup/Tower) for tougher stains.
- **Vermiculite** (optional)
  - Many farm or garden stores will likely have vermiculite, which help keep seeds damp to accelerate germination. Any medium-grade-size vermiculite will work.
  - You may also choose to plant seeds into the rockwool cubes indoors without adding vermiculite on top of the seeds. The plants will grow well without the vermiculite.
